## DETAILED ACTION

### *Election/Restrictions*

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I(a). Claims 32 and 42 drawn to an automated terminal and method of use, classified in class 705.
  - I(b). Claims 33-38 and 43 and 44 are drawn to a self service terminal and method of use, classified in class 705.
  - II. Claims 39-41 and 45, drawn to an ATM, classified in class 705
2. Inventions I(a)\_ or I(b) and II are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the the ATM machine is a stand alone unit that has a different function, (e.g., dispensing money).
3. Because these inventions are distinct for the reasons given above and the search required for Group I(a) and I(b) is not required for Group II, restriction for examination purposes as indicated is proper.
4. If Group I (1(a) and 1(b) is elected, then the following species election is required.
5. This application contains claims directed to the following patentably distinct species of the claimed invention: Group 1(a) and 1(b).

Art Unit: 3624

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, none is generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.
